

## GIS in Water Resources Term Project Proposal

Your GIS in Water Resources Term Project Proposal is due September 20. This should be a 1 page document that is prepared in PDF. It should give the following

- proposed title
- objective for your term project
- data that you propose to use and how you will get it
- An outline of the steps you need to complete to do this project

The Engineering Writing Center (SER130) (<https://engineering.usu.edu/students/ewc/index>) is available to help improve the technical writing associated with class writing assignments. You are encouraged to have the writing center help with all phases of your term project, including proposal, progress report and final paper. To incentivize this I will allocate 5% of the final term project grade for having had your work reviewed by the writing center. 1% will be for the proposal, 1% for the progress report and 3% for the final paper. After consultation with the writing center you should receive an email confirmation of your visit. Forward this email to me to receive this writing center credit. You can make appointments with the writing center at <https://engineering.usu.edu/students/ewc/index> or by emailing [ewc@usu.edu](mailto:ewc@usu.edu). Be sure to plan ahead and allow enough time for this visit, recognizing that towards the end of the semester they may be busy and unable to schedule appointments on very short notice.

Your 1 page proposal document should be named "Proposal.pdf" (use first letter upper case and the rest lower case the name) and saved in a HydroShare resource (at <http://www.hydroshare.org>) named with subject keyword GISWR2017. For title, use the tentative title for your term project. You may (and should) change this if your plans and title change.

See <http://hydrology.usu.edu/dtarb/giswr/2018/HydroShareInstructions.pdf> for instructions on saving this in HydroShare.
